Software Engineer

SUMMARY

Seasoned Software Engineer with six years of expertise, specializing in system design, business modeling and full-stack development. Strong problem-solving skills and a deep understanding of software architecture. Led the pioneering development team at Poly186 AI DAO, successfully steering projects to advanced stages.

KEY ACCOMPLISHMENTS

- Successfully structured and managed Development and Product departments at Poly186. Developed streamlined workflows, which **increased project delivery efficiency by 50%**.
- Played a pivotal role in startup's progression from inception to full-scale development and production, overseeing the **shift from initial ideas to a thriving operational phase**.
- Led the **design, development, and successful launch** of a Flutter-based mobile app for Fence: Social Distance. Collaborated with the Product Owner to define requirements and deliver a user-friendly app promoting social distancing. (May 2020 – Jun 2020)

WORK EXPERIENCE

Chief Technology and Product Officer / Poly186

Sep 2021 – Present / United States

- **Established and managed** the Development and Product departments, implementing and documenting streamlined workflows that resulted in a 50% increase in project delivery efficiency.
- **Managed a team of 4 developers and 3 designers**, working cross-functionally on different products and projects (NFT minting, wallet tied to account, crypto purchase), expending 50% of time coding.
- **Conducted scrum meetings**, code reviews and provided constructive feedback to ensure codebase quality, tracking progress of the teams.
- Carried out modernization of previous source code, **documenting** old and new code bases.
- Introduced and oversaw **automated testing and CI/CD**.

Full-Stack Developer / Avybe

Jan 2021 – Jun 2021 / Canada

- Collaborated within a fast-paced, distributed team, making significant contributions to the development of **new features** for a video streaming platform.
- Implemented file storage **using AWS S3**.
- **Designed and developed** new use cases and business flows, developing innovative features across backend (Django), frontend (React Native), and database (PostgreSQL).

Staff Developer / OfficeNinjas

Sep 2019 – Dec 2020 / United States

- I specialized in Zapier, using JavaScript to **integrate third-party apps**, which significantly enhanced productivity in an online distributed environment.
- I was responsible for **designing and testing** email/newsletter templates in ActiveCampaign, utilizing HTML and CSS.

Business Analyst and Full-Stack Developer (Early Career Experience)

- **Jun 2019 – Aug 2019, Fondo de Valores Inmobiliarios, Venezuela:** I collaborated within a team to streamline development for a BonitaSoft-based solution. Optimized BPM flows, enhanced reporting efficiency using JasperReports, and contributed to frontend improvements with Angular. Additionally, managed databases on Microsoft SQL Server.
- **May 2018 – May 2019, Freelancer:** Designed databases using MySQL Workbench, created BPMN diagrams, and proficiently handled SQL queries, procedures, and triggers to enhance data management and system functionality.

PERSONAL SKILLS

- Communication
- Teamwork
- Problem solving
- Attention to detail
- Critical Thinking
- Proactive
- Project Management
